

Who We Are

BACKGROUND

The Cyberdiplomat is a technology and cybersecurity venture that operates globally, with a presence in India, UK, Africa and the United States. Our proactive approach ensures that we provide ethical and practical solutions that cater to the needs of businesses, institutions and individuals while upholding a culture of respect and purpose. With our extensive knowledge and expertise, we confidently advocate for a cyber policy that guarantees a secure ecosystem and enables best practices.

VALUES

In collaboration with our partners, we are firmly committed to spearheading a transformative initiative aimed at advancing technology that enhances both our health, global democratic processes, and the exchange of information.

GOALS

As a leading cybersecurity service provider, Cyberdiplomat understands that the digital world is constantly evolving. That's why we invest heavily in people, process innovation and the latest technologies to stay ahead of emerging threats. Our solutions are designed to address the full spectrum of cybersecurity risks, including human factors, diplomacy, policies, IT governance, hacking or malware, phishing and social engineering. So, whether you're looking to secure your data or protect your business against cyber threats, training professionals or seeking any other cyber services, we've got you covered.

THE CYBERDIPLOMAT

We Serve to Solve

Services

VULNERABILITY ASSESSMENT & PENTESTING

Empower Your Business Against Cyber Threats with Our Comprehensive Vulnerability Assessment and Penetration Testing Solutions

CYBER THREAT ASSESSMENT

Secure your digital infrastructure or devices that need to constantly evolve to keep up with the latest advanced persistent threats. There are two ways to find out if your solution isn't keeping up - wait for breach to happen or know about the cyber threat landscape and run validation tests.

TRAININGS, WORKSHOP & SIMULATION

We offer a range of courses, workshops, such as cybersecurity for drones, cybersecurity for telecommunication infrastructure, cybersecurity for infrastructure, and a course on blockchain and cryptocurrency. These trainings and workshop are for corporates, schools, colleges and also for individuals.

RESEARCH & INNOVATION

We provide research, insight, and intelligence on cyber-related issues. Our insights and report provide a holistic thought leadership that enables intelligent decision-making.

CYBER CONSULTANCY

Cybersecurity, strategy, risk, compliance and resilience team at CyberDiplomat can provide organisations or individuals with a clear picture of their current cyber risk posture and capabilities, giving them an informed view of how, where and why to invest in cybersecurity capabilities.

CYBER AUDIT

Deeply analyse organisational cybersecurity posture. Get a lowdown on the deep threats and know what it takes to mitigate them. Unlock intelligent risk management. Perform a Cyber Audit.

CENTRE FOR EXCELLENCE IN CYBERSECURITY

Building Centre for Excellence in Cybersecurity (CyberCoE) will ensure that the university or college develops the capability and capacity for enhanced research and skill development in the area.

Projects

CYBER DIPLOMACY

Our CyberDiplomat initiative aims to empower policymakers by providing them with in-depth policy research, cyber simulation exercises, and high-level meetings. We are dedicated to enhancing cyber capacity and expertise among policymakers to ensure that they are equipped to tackle the ever-evolving challenges of the digital landscape.

Choose Us

CYBERPSYCHOLOGY

Cyberpsychology has both positive and negative effects. However, it's important to note that it can lead to mental disorders like insomnia, aggression, and anxiety. These disorders can affect personal and social relationships with colleagues, family, and friends. Therefore, Cyberpsychology training is essential in today's world to promote healthy communication and understanding of interactions and perceptions. We also provide individual or group cyber-counseling.
